**BOSTON** — WorldCare International, Inc. will sponsor *Benefit & Pensions Monitor's* industry event "Controlling Plan Costs and New Approaches to Drug Plan Management," taking place on April 20, 2017, at St. Andrew's Club & Conference Centre in Toronto.

The event, which sold out last year, focuses on the challenges created by rising drug costs, the demands of keeping an aging workforce on the job and the ability to recruit the best new employees. These challenges for benefit plan sponsors include increased use of biologics and how subsequent entry biologics create new challenges to plans, as well as the important role that traditional drug management, such as generic drug substitution and managed formularies, play in drug plan management. Richard Heinzl, MD, Global Medical Director, WorldCare International Inc., will speak on cost containment and how to approach growing specialty drug prices at the session in April.

"This is a great opportunity to share WorldCare's cutting edge scientific and medical knowledge with important professionals in the insurance and employee benefits community," stated Richard Heinzl, MD, Global Medical Director, WorldCare International, Inc.

"Benefits and Pensions Monitor is honored to partner with WorldCare International Inc. at this special industry event. We are excited to hear Richard Heinzl share his insights and knowledge on this very important topic to an audience of industry experts," stated Kristyn Dougall, Executive Meeting & Event Manager, *Benefits and Pension Monitor*.
