BOSTON — With over a quarter of a century of experience providing virtual medical management services, including remote medical second opinion services, WorldCare International, Inc. will sponsor *Benefit & Pensions Monitor's* industry event "Technology and Healthcare Plan Innovation," taking place on September 14, 2017, at the InterContinental Toronto Centre in Toronto.

The event focuses on how emerging technologies are bringing unprecedented changes to the way plan members manage their own health and access healthcare, including how these innovations are shaping insurance product coverage, as well as the implications for plan members and sponsors. Clark will be discussing a variety of emerging health-related technologies including wearables, IoT devices, big data and digital pathology, along with the impact these technologies are having on overall wellness and how they are providing a more effective and efficient way to improve outcomes.

"We are only just beginning to see the potential impact of technology on overall health and wellness. We are about to witness over the next 10 years a profound change in the use of technology in all aspects of health and wellness," stated Paul Clark, Chief Technology Officer, WorldCare International, Inc.

"Benefits and Pensions Monitor is honored to once again partner with WorldCare International Inc. at the Technology and Healthcare Plan Innovation event in September. In today's society, we are used to using technology for just about everything. Why should it be any different for our health and wellness? We are excited to hear Paul Clark share his insights on new healthcare technology – what's out there, what's coming and the impact on healthcare plans," stated Kristyn Dougall, Executive Meeting & Event Manager, *Benefits and Pensions Monitor*.
